

## ARCHITECTURAL DESIGNER

## BLACKLINE

## INDY

[www.blacklinestudio.net](http://www.blacklinestudio.net)

Blackline prioritizes design towards positive impact on the communities where we work. We are seeking a creative, motivated, and detail-oriented Architectural Designer to join our team in Indianapolis. If you're passionate about design, thrive on variety, and enjoy being involved in projects from concept through construction, we'd love to meet you.

**About the Role:** While a professional degree in architecture is preferred, Blackline will consider applicants with proven construction documentation skills and a minimum of two years of architectural office experience. Our work spans a wide range of project types—single- and multi-family residential, corporate/office, hospitality, and civic/cultural so we're looking for a versatile designer who is comfortable operating at multiple scales.

What we're looking for:

- A great listener who follows direction and can work collaboratively as well as independently
- A designer that is eager to contribute ideas and help shape design on projects through all phases with particular emphasis on construction documents.
- Someone who is highly organized with a learning mindset

**Tools We Use:** You'll work primarily with Revit (with Enscape for rendering), Adobe Creative Suite, Bluebeam, Microsoft Office, and occasionally Rhino, SketchUp, and AutoCAD.

**What We Offer:** Blackline is committed to supporting your growth and well-being.

- Competitive salary (based on experience, range \$65,000 to \$75,000)
- Benefits package
- Flexible hours and hybrid/WFH schedule (2 days per week)
- Opportunities for professional advancement, mentorship, and skill development, including licensure support.

**How to Apply:** Please email résumé and portfolio (pdf or link) to:
