

Project Manager/Project Architect

Location: Fort Wayne, Indiana

Garmann Miller is seeking a full-time project manager/project architect to join our Fort Wayne, Indiana, area team. This role is ideal for a professional with 5–10 years of experience who can lead project coordination, client communication, and design execution across multiple sectors, with a focus on K–12 and public architecture.

Responsibilities:

- Coordinate all project phases from concept through construction
- Serve as the primary point of contact for clients and design teams
- Communicate project goals, deadlines, and technical requirements
- Manage project schedules, budgets, and deliverables
- Oversee development of construction documents and ensure quality control
- Interpret and apply building and zoning codes
- Collaborate with consultants, contractors, and stakeholders

Experience/Certifications:

- Degree in architecture, engineering, or construction management (preferred)
- 5–10 years of relevant experience (K–12, municipal, healthcare, or commercial architecture preferred)
- Proficiency in Revit and building information modeling (BIM)
- Strong knowledge of design development, detailing, and construction documentation
- Familiarity with construction techniques and contracts
- Architectural license a plus

Complete benefits package and pay commensurate with experience. Garmann Miller is an equal opportunity employer. Learn more at creategm.com.

Qualified individuals should submit a cover letter and resume to Rebecca Backs at careers@creategm.com.
