Senior Designer

CRAFT Architecture | Hammond, Indiana

CRAFT Architecture is seeking an experienced, technically proficient Senior Designer to develop and coordinate architectural drawing packages from schematic design through construction documents.

The successful candidate will play an important role in producing accurate, well-coordinated architectural documentation, collaborating with project teams and consultants, and supporting the successful delivery of architectural projects.

Key Responsibilities:

- Develop and coordinate architectural drawing packages through schematic design, design development, and construction documents.
- Produce detailed architectural plans, drawings, schedules, and construction details.
- Incorporate design review comments, revisions, and project updates into drawing packages.
- Coordinate architectural documentation with engineering consultants and other project team members.
- Support code compliance, zoning reviews, and permitting documentation.
- Maintain a high level of technical accuracy, consistency, and quality throughout the documentation process.

Qualifications:

- Substantial experience developing and producing coordinated architectural drawing sets.
- Strong technical detailing and architectural documentation skills.
- Proficiency with relevant CAD/BIM software and tools.
- Experience coordinating with multidisciplinary design teams and consultants.
- Strong attention to detail, organizational skills, and the ability to manage multiple project priorities.
- Architectural licensure is not required. However, applicants who are not licensed must have passed at least one professional licensing examination and have a clear plan to complete the remaining examinations.

How to Apply:

Interested candidates are encouraged to visit the CRAFT Architecture Careers website for additional information and application instructions.
